

Based on the National Education Policy (NEP) 2020, Scholastic Start Smart integrates the principles of design thinking into its vision for holistic, interdisciplinary, and experiential learning. It's C.R.E.A.T.E. (Connectedness, Responsibility, Engagement, Authenticity, Transformation, Evaluation) framework

- ▶ Encourages Creativity and Innovation
- ▶ Project-Based and Experiential Learning
- ▶ Holistic and Multidimensional Education
- ▶ Inclusion of Vocational and Life Skills Education
- ▶ Interdisciplinary and Multidisciplinary Learning
- ▶ Problem-Solving and Critical Thinking
- ▶ Integration of Technology and Digital Learning

Holistic Progressive Card (HPC)

HPC is a comprehensive and multidimensional assessment system aimed at evaluating students' progress in a more balanced and broad manner. A student's overall development is tracked, including cognitive, social, emotional and physical growth.

The key features of the Holistic Progress Card

Comprehensive and Multidimensional Assessment:
Focus on All-Around Development
Personalised, Student-Centric Report
Continuous and Formative Assessment
360-Degree Feedback

Self-regulated and Continuous Professional Development of Teachers

The Programme is embedded with videos along with self-assessment for the teachers.

These videos will be accompanied with an assessment, to be completed for certification.

Online teacher training programs are aligned with the learning outcomes, ensuring that teachers can design their lessons and assessments to meet these goals.

Teacher training will focus on the pedagogical approaches needed to help students achieve these outcomes, with an emphasis on active learning, critical thinking and problem-solving.

As per NEP teachers will be trained for SEL.

Multidimensional Learning Outcomes

The curriculum aims at ensuring that all students reach their essential learning milestones by Grade 3. To achieve that the curriculum aims at developing strong foundational literacy and numeracy skills along with holistic development of physical, cognitive, social-emotional and creative aspects through engaging activity-based methods.

The other key detail that the programme focuses on is to bridge the gap between home and school environment while catering to diverse learning needs and abilities that impact the learning outcomes of children. For these learning outcomes to be achieved the fundamental skills focused upon are critical- thinking, problem solving, communication and collaboration which build strong foundational skills.

Lastly, Holistic Progress Card (HPC) allows the teacher to continuously monitor the learning curve of each student. HPC is a comprehensive and multidimensional assessment system aimed at evaluating students' progress in a more balanced and broad manner. This approach moves away from the traditional focus on exam-based academic performance alone, ensuring that a student's overall development is tracked, including cognitive, social, emotional and physical growth.
